

Leonarda Lovrić

Summary

MA Interaction Design student at ZHdK with a BSc in Computer Science and professional product design experience. I use generative AI and AI-assisted development to explore, prototype and build interactive systems and design tools. My practice connects UX, creative technology and software implementation, turning experimental ideas into functional prototypes.

Skills

AI & Development
Codex, Claude Code etc.
AI-assisted prototyping
LLM integration
Multi-agent systems
Python · TypeScript
React · Web development

Creative Technology
Creative coding
Generative systems
WebXR · Gaussian splatting
Real-time interaction
Computer vision

Design
Interaction & UX design
Design systems
AI-assisted design workflows
UI prototyping
Brand & motion
Figma · Adobe CC

Research
User research & testing
Data visualization

Education

MA Design *Sep 2026 – present*
Zurich University of the Arts
Major Interaction Design, Minor Immersive Arts

Erasmus+ Exchange: Creative Technology *Feb – Jul 2026*
University of Twente
Modules: Hands-on AI · Data From the Source to the Senses

BSc Computer Science *Oct 2022 – Jul 2026*
University of Zagreb
Relevant courses: Artificial Intelligence · UX/UI Design · Software Development · Algorithms · Databases · Product Management

Experience

Digital Product Designer *Jul 2024 – Feb 2026*
Tomsoft · Full-time · Zagreb, Croatia
Established the first design system for a B2B software ecosystem used by 200+ companies, accelerating feature delivery by approximately 50%. Designed complex workflows and reusable UI components, translating product requirements into prototypes and implementation-ready designs. Collaborated closely with developers and leadership to scale design across products.

Selected Projects

Calibrated: AI-Assisted WebXR *2026 – present*
ZHdK · Experimental interaction design
Developing an experimental WebXR experience using Gaussian splatting. Using OpenAI Codex throughout the design and development process to rapidly explore interaction

Languages
English: C1
German: A2
Croatian: native

concepts, build functional prototypes and iterate on spatial experiences outside traditional game engines.

Brainy Storm: AI Collaboration Platform *Oct 2026*
Hackathon project · Ongoing development
Designed and developed an AI-powered brainstorming platform integrating multiple agents for live transcription, idea organization and research. Used Codex to experiment with UI and brand directions and build custom tools supporting the design process.

Echo: Generative Audiovisual System *Feb – Jul 2026*
University of Zagreb · Bachelor's thesis · 5/5
Designed and developed an interactive installation translating body movements into generative sound and visuals through real-time motion tracking. Built a closed feedback loop between movement and audiovisual output. Evaluated the experience with 10 participants.

Volunteering

Design Team Lead & Board Member *Oct 2023 – Jul 2025*
EESTEC LC Zagreb
Led the design team and organized workshops on Figma and Adobe tools. Coordinated branding and communications, contributing to a 500% increase in active membership.

Awards

I'm Still Here: AI-Powered VR Experience *Nov 2026*
ArtTech Hackathon · Best Use of ElevenLabs
Developed an immersive VR experience simulating anxiety through sensory overstimulation, integrating ElevenLabs for AI-powered audio. Designed the experience to raise awareness and introduce immediate self-help techniques for managing anxiety.

Creativity Award @ CreaTe, University of Twente *Jul 2026*

2nd Place @ Hackl Hackathon *Apr 2025*

Rector's Award, University of Zagreb *Nov 2024*

1st Place @ Best Design Days *Nov 2023*
